

EUROPEAN
CONGRESS

EMBEDDED REAL TIME SYSTEMS

ERTS 2020

FROM 29th TO 31st JANUARY / TOULOUSE FRANCE
PIERRE BAUDIS CONGRESS CENTER

Opening Session

Jean Arlat
ERTS 2020 Programme Chair

LAAS-CNRS

Scientific Advisor
French Embassy to the UK - London

Outline

- ❖ Trends, Challenges and Opportunities for Embedded Resilient & Time-critical Systems
- ❖ About the Congress: **The 10th Edition of ERTS**
- ❖ Programme Highlights

Trends, Challenges and Opportunities for Embedded Resilient & Time-critical Systems

Jean Arlat
ERTS 2020 Programme Chair

LAAS-CNRS

Scientific Advisor
French Embassy to the UK - London

Embedded Systems

- ❖ Computerized System Executing Specific Functions within an Host System, Generally with Stringent “Non Functional” Requirements:
Real-time, Resilience, etc.
 - ❖ Historically, Deployed in Specific Application Domains:
Energy Production, Industrial Processes, Telecommunications, Transportation (at large)
- => The Original Core Target for ERTS!**

Trends

- ❖ **Penetration/Integration** of Digital Devices Beyond Original Application Areas (e.g., Transportation, Energy, etc.):
“Smart” People, Home, City, Factory, Health care, Agriculture, Services, etc.
- ❖ **Emerging Features:** Ubiquity, Mobility, Connectivity, Human Machine Interaction, Autonomy, etc.
- ❖ **Strong Linkage** between Information Processing Level (**Virtual Dimension**) and Physical Resources Level (**Real Dimension**)
- ❖ Intensive Deployment of **Smart Objects** (e.g., sensors for context monitoring)
- ❖ Development of Research & Enabling Technologies: **CPS, AI, IoT, AI, ...**

Internet Users \approx 60%

World population (mid 2019):
7,716,223,209

Estimation:
More than **21 billion IoT devices by 2025**

Source: Internet World Stats - www.internetworldstats.com/stats.htm
Basis: 4,536,248,808 Internet users estimated in June 30, 2019
Copyright © 2019, Miniwatts Marketing Group

Challenges

- ❖ Intensive Data Processing => **High Performance Computing**
- ❖ Autonomy, Multiple Interactions => **Complex Decision Making**
- ❖ Strong Dependency on the Infrastructure => **Resilience**
- ❖ More Open Systems (thus Attack-prone) => **Security => Safety**
- ❖ Multifaceted Issues with Huge Societal Impact
[Awareness, Accountability, Acceptability, Privacy,...]
=> **Systemic/Holistic and Multidisciplinary Approaches**

Much Efforts and Dedicated Skills Required

Opportunities

Toulouse and The Region: A Leading Role in the Emergence and Development of Embedded Systems

Some Milestones:

Some Recent Achievements & Breakthroughs

- ❖ Strengths and Roadmap Developed in the White Paper on Intelligent Terrestrial Transportation (**Automotech, Mipirail, Primus Défense & Sécurité, Robotics Place**)
- ❖ Major Projects: **Hyperloop, eHorizon, Attol, Electric flight, OneWeb, EGNOS V3**, etc.
- ❖ Infrastructures and Support for R & I: **ADREAM** Building, **B612** Building, **Francazal** Site, **Toulouse Tech Transfer**, etc.
- ❖ Emerging Key Players: **SigFox** (IoT Communication), **Delair** (Drones), **Naïo** (Agriculture Robots), **EasyMile** (Driverless), etc.
- ❖ **18 Dec 2019**: Take off of an Airbus A350 without human intervention
- ❖ **19 Jan. 2020**: Test of Hyperloop in Francazal Site

The New Frontier and the Way Forward

Embedding (Artificial) Intelligence into the Systems of the Future

- ❖ Developing **Public** Awareness of Innovative Technologies
- ❖ Enhancing **Skills** for Digital System Design & Assessment
- ❖ Funding **Research and Innovation** on **Resilient** Digital Technologies, Data Science & Artificial Intelligence
- ❖ Conducting Comprehensive **Experimentation** and **Valuation** of the Candidate Approaches/Solutions

Artificial & Natural Intelligence Toulouse Institute

Develop a **Hybrid** Approach Mixing
Model-based and **Data-based IA**,
To Address the Challenges at Stake:

**Acceptability, Explainability, Fairness, Flexibility,
Resilience, Scalability**

- ❖ **Pillars: Education, Research, Innovation**
=> Foster **Economic Development**
- ❖ **Key Local Players Involved**
- ❖ **Openness to Talents and Collaborations**

==>

The Alan Turing Institute

www.turing.ac.uk

- ❖ The UK National Institute for **Data Science** (2015) and **Artificial Intelligence** (2017)
 - Advance **world-class research** and apply it to **real-world problems**, generating the **creation of new businesses, services, and jobs**
 - Train the **leaders of the future** with the necessary breadth and depth of **technical and ethical skills** to match the UK's growing industrial and societal needs
 - Lead the **public conversation**: encompassing research priorities, public engagement and expert technical advice, to develop new solutions significantly impacting **industry, government, regulation, or societal views**
- ❖ Major UK Universities Are Involved
 - Cambridge, Edinburgh, Oxford, UCL, Warwick (2015)
 - + Leeds, Manchester, Newcastle, Queen Mary University of London, Birmingham, Exeter, Bristol, Southampton (2018)

About the Congress: The 10th Edition of ERTS

Jean Arlat
ERTS 2020 Programme Chair

LAAS-CNRS

Scientific Advisor
French Embassy to the UK - London

Paper Submission and Selection Process

❖ Call for Contributions

- Submitted papers: **105** => Regular: **87** and Short: **18**

❖ Reviewer Assignment & Evaluation

❖ Monitoring & Reviews Consolidation by “Super-reviewers”

❖ Program Committee Meeting

- Accepted papers: **67** => Regular: **56** and Short: **11**

❖ Shepherding Process

=> Final contributions: **64**

- Regular Paper + Presentation: **55**
- Short Paper + Poster: **9**

Evolution of Continuous Topics ($\approx \frac{3}{4}$ papers)

Evolution since 2018 (Including New Topics)

About the Technical Programme

❖ Paper Presentations

Organized by Sessions According to **Six Major Topics**

Autonomous and
Connected Systems **3**

Processes, Methods
and Tools **1**

Resilience **8**

Embedded Computing
Platforms and
Networked Systems **4**

Model Based
System Engineering **3**

Scheduling **3**

Keynote Addresses

Marta Kwiatkowska

Professor, Computing Systems, University of Oxford, UK

***Safety Verification for Deep Neural Networks
with Provable Guarantees***

[Wednesday - 11:30]

Jean-David Malo

Director Open Science and Innovation

DG Research and Innovation, European Commission

EU Funding for Innovation

[Wednesday - 13:45]

Marc Mortureux

General Manager of the National Automotive & Mobility Platform (PFA)

The Challenges of the Automotive Industry

[Thursday - 9:00]

Panels

Certification of Machine Learning for Safety Critical Applications: Probable, Plausible or Impractical?

[Thursday - 16:00]

Chair: Claire Pagetti, Onera/ENSEEITH, ANITI Chair on CertifAI, FR

Panelists: Christophe Gabreau, Airbus, FR; George Romanski, FAA, US;

Guillaume Soudain, EASA, DE, François Terrier, CEA & INSTN, FR;

Hugues Bonnin, Continental Digital Service, FR

Challenges for Robotics and Autonomous Systems With Human Interaction: A Multi Domain Perspective

[Friday - 11:30]

Chairs: Hélène Gaspard-Boulinc, DSNA/DTI, FR

Philippe Palanque, IRIT – FR

Panelists: Medical: Jean-Loup Chrétien, Tietronix, FR; Marc Garbey, Houston Methodist, US;

Agriculture: Hélène Waeselynck, LAAS-CNRS, FR;

Air traffic control: Stéphane Chatty, DGAC, FR; Flight control: Christine Gris, Airbus, FR

Special Focus Session

Building the Future Today: A Certification Path for Hyperloop Technology

[Thursday - 18:00]

Mohamed Kaâniche, LAAS-CNRS, FR

Panelists

Benjamin Pasquier, RAMS Engineering Director, Virgin Hyperloop One, US

Jean-Louis Boulanger, Lead Assessor Leader, Certifer, FR

And also...

❖ **Coffee Break “Busy Programme”**

Posters, Exhibition, Networking, etc.

❖ **Poster Overview Session**

Philippe Cuenot, Continental Automotive SAS, FR

[Thursday - 9:45]

Industrial Co-Chairs Addresses

[Wednesday - 11:00]

Alexandre Corjon

Alliance (Renault-Nissan) Global Vice President,
Electrics, Electronics and Systems - France

Evolutions of Automotive EE & SW Technology

Charles Champion

Chairman of the Toulouse-Blagnac Airport
Supervisory Board

***A Perspective on Embedded Real Time Software
in Commercial Aviation***

Thanks to

- ❖ The Congress Main Architect and Craftman: **Louis-Claude Vrignaud**
- ❖ The Scientific Coordinators: **Jean-Paul Blanquart, Philippe Cuenot, Kevin Delmas, Hervé Delseny, Adrien Gauffriau, Christophe Grand, Mohamed Kaâniche, Claire Pagetti**
- ❖ The Organizing Societies: **Francis Guimera, Dominique Mary**
- ❖ The Industrial Co-Chairs: **Alexandre Corjon, Charles Champion**
- ❖ The Members of the International Programme Committee (see the Programme)
- ❖ The Sponsors and the Partners (see the Programme)
- ❖ The The Many People Involved in the Organization
- ❖ The Keynote Speakers, the Panelists, the Contributors and the Audience!

EUROPEAN
CONGRESS

EMBEDDED REAL TIME SYSTEMS

ERTS 2020

FROM 29th TO 31st JANUARY / TOULOUSE FRANCE
PIERRE BAUDIS CONGRESS CENTER

Enjoy!
